

## Transportation Cost Management

### Decades of Experience

enVista brings unparalleled experience designing and implementing transportation solutions, managing transportation operations, and auditing carrier invoices. We have a proven track record of success reducing transportation costs from source to consumption, and we are passionate about helping clients run more efficient and profitable operations.

### Transportation Consulting

enVista is highly skilled at reducing transportation costs across the enterprise. When it comes to freight pricing, our transportation cost management experts understand how the carriers function and their operating ratios. As a result, we're able to level the contract negotiation playing field for clients to obtain the best pricing.

enVista is deeply experienced in all manner of transportation analysis, including: strategic network design, carrier sourcing, carrier contract analysis and negotiation, and more. Our proprietary software solutions ensure objective, data-driven analysis and decision-making. These analytics and consulting services may be project-based as needed, using experts familiar with your operations, business processes and data.

### Invoice Audit and Payment

Through extensive consultations with leading manufacturing and distribution-centric companies, enVista developed a superior service that tracks transport carriers' service levels and late deliveries, while providing visibility to, and data warehousing for, shipment information. This data is then leveraged in carrier rate negotiations to significantly reduce carrier rates.

Our proven, proprietary invoice audit solutions evaluate carrier services across all modes of transportation, from source to consumption, including: ocean, rail, intermodal, drayage, LTL/FTL, and parcel.

We pride ourselves in offering the most comprehensive, robust auditing tools in the industry. From tracking delivery failures, to verifying contract rates and incentives, to identifying invalid accessorial charges, enVista provides the maximum refund recovery for our customers. Furthermore, enVista's executive dashboard enables transportation leaders to tailor the online portal to monitor their internal metrics and KPI's with optimal visibility.

### Save 15 – 30% annually in transportation costs

Each year, enVista saves hundreds of clients 15-30% annually on their transportation spend. For some companies, that translates into millions of dollars in savings.

## Transportation Cost Management Services

### Transportation Consulting
