

Dansko Makes History:

Distinctive Distribution in a State-of-the-Art Facility

When Dansko, a shoe designer and distributor known for its comfortable and stylish shoes, outgrew its 80,000 square foot distribution center, it partnered with enVista to design a new, state-of-the-art facility optimized for efficiency and future growth. The project goals were to reduce labor-intensive processes and meet growing customer demand. enVista's Facility Design and Build team helped Dansko:

- Design a new 200,000 square foot distribution center that reduced labor requirements by 20-30%
- Develop a design that optimizes storage and utilizes a sophisticated Warehouse Control System
- Increase flexibility and throughput
- Achieve the highest shipping volume in company history, significantly improve customer service levels and take on new accounts
