

OUTSOURCING FREIGHT AUDIT & PAYMENT

WHY YOU SHOULD CONSIDER TAKING THE PLUNGE

Most ERP and warehouse management systems are not set up to handle freight invoices

Only one in 10 freight invoices is accurate ³

If a freight bill payment company pays the same bill, the cost to the shipper is about 25% lower ¹

It costs a large company about \$5 (domestic) and \$6 (international) in fully allocated costs to manually pay ONE freight bill ²

Using a single outsourced solution can provide better visibility across units and geographies
