

Artificial Intelligence for Supply Chain

Increase the value of your existing supply chain investments, using less capital, with enVista's artificial intelligence (AI) services.

Artificial intelligence (AI) has become a buzzword across all industries, but for many the question still remains: what is AI really, and how can it truly be leveraged to enhance your supply chain? enVista's AI services take the mystery out of this emerging technology, empowering supply chain leaders to leverage tangible solutions that will increase the performance of their existing supply chain systems and investments, using less capital than they would use with other interventions.

AI Bolt-Ons for Supply Chain Systems

The most immediate and valuable way to leverage AI in your supply chain today is via bolt-ons to your existing supply chain systems. Across all areas of

the supply chain, adding AI will enable supply chain leaders to find savings they may otherwise have missed, adding up to significant savings when all is said and done. enVista can offer AI bolt-ons to all the key areas of the supply chain.

- Warehouse Management System
- Transportation Management System
- Labor Management System
- Enterprise Resource Planning System
- Supply Chain Planning
- Inventory and Assortment Management
- Network Design

Our Proven Methodology

enVista's enABLE Methodology is a proven and successful implementation approach that enables companies to successfully operate after the project go-live. The enABLE Methodology utilizes a waterfall methodology and focuses not only on the project requirements but also the training required to effectively operate. Additionally, enVista aligns with our vendor partners' implementation methodology for a streamlined approach. Our enABLE methodology begins with an assessment, followed by building, learning, and execution:

Assess:

Our methodology begins with a comprehensive evaluation of your organization and supply chain structure. We will evaluate your business requirements and available vendors, then guide you through shortlisting, system demonstrations and final recommendations.

Build:

Once an AI system has been selected for your organization, our team will guide you through the system design and execution, including project planning, configuration, testing and more.

Learn:

The key to any successful system implementation is training, integration and User Acceptance Testing. enVista's team will guide you through these steps to ensure the post-implementation process goes as smoothly as possible.

Execute:

In the last phase of the project, we execute the project plan and begin using the solution in a live environment. This stage addresses any system challenges, stabilizing the workforce and ramping up the operation to standard throughput levels. We also help ease the transition to a self-sustaining operational mode.

About enVista

enVista is the leading supply chain and enterprise consulting firm and the premier provider of supply chain technology & strategy services, material handling automation & robotics, Microsoft solutions and IT managed services. With 20+ years of unmatched domain expertise, enVista serves thousands of leading brands. enVista's unique ability to consult, implement and operate across supply chain, IT and enterprise technology solutions allows companies to leverage enVista as a trusted advisor across their enterprises.

Consulting and solutions delivery is in our DNA.

Let's have a conversation.®
