

Why enVista Order Management and Blue Ridge Supply Chain Planning?

- Combine supply chain planning and forecasting with order orchestration and visibility – in real-time – to increase omnichannel inventory agility and profitability
- Transform omnichannel retail by connecting supply chain planning and forecasting data with order orchestration, management, and visibility – in real-time – to optimize inventory and deliver an exceptional customer experience

Blue Ridge Intelligent Supply Chain Planning & Pricing

- **Advanced AI Demand Forecasting** – Automatically detect trends, patterns, seasonality, respond rapidly to changing conditions with flexible methods of inventory allocation
- **Collaborative Planning & S&OP** – Collaborate internally and across your extended supply chain network to reduce customer disappointments, lower operating expenses, and synchronize sales, marketing, operations and finance
- **Optimized Allocation & Replenishment** – Avoid lost sales and profit erosion from poorly positioned inventory and manage cost-effective in-stock levels in all locations
- **Optimize Pricing** – Uncover over/underpriced items across broad assortments, multiple channels, and locations and fend off competitive threats and drive profitability

enVista Order Management System (OMS)

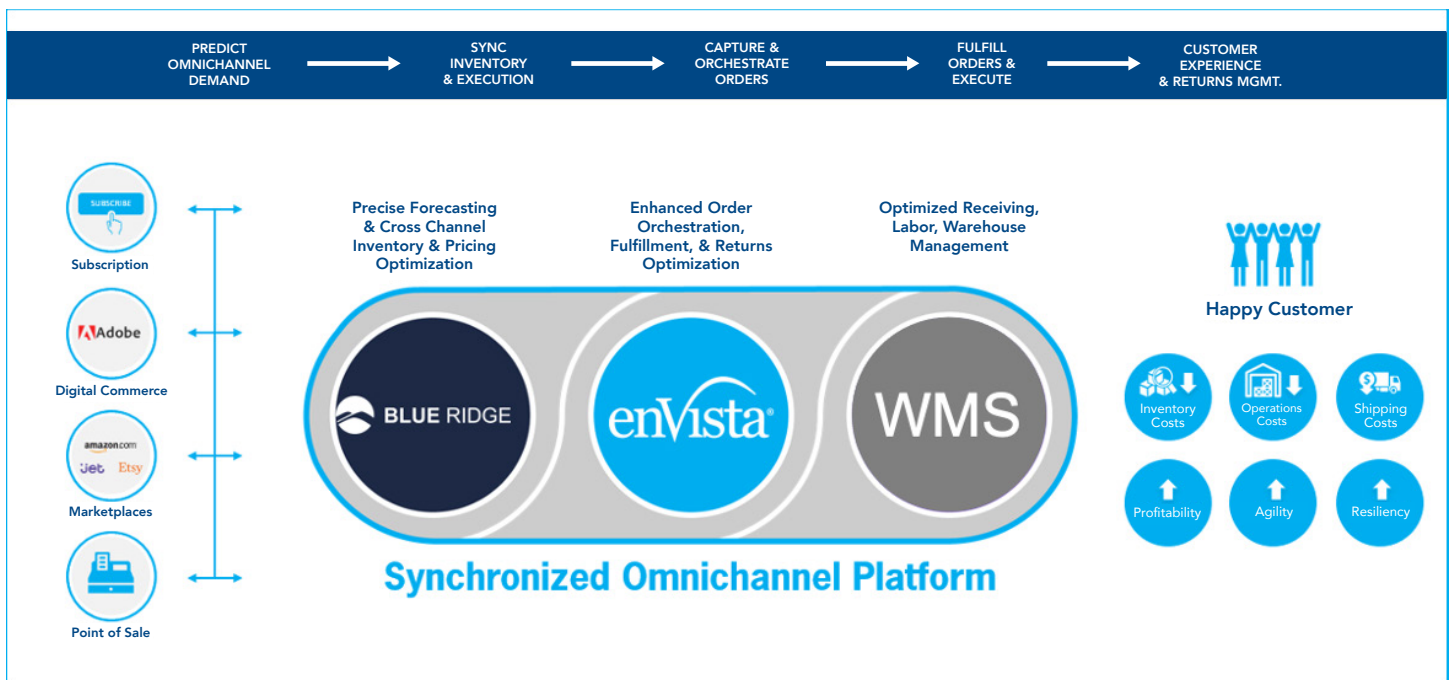

- **Enterprise Order Orchestration** – Reduce the likelihood of order-split shipments and save on your transportation costs with order alignment across the complex network of stores, distribution centers, suppliers and 3PLs
- **Omnichannel Fulfillment** – Create order promises and fulfillment based upon inventory availability across the enterprise to enable omnichannel allocation and automatic/dynamic fulfillment based on global rules
- **Enterprise Visibility** – Gain a single enterprise view of customer, inventory, order, item, shipment and payment required to provide a single, stellar enterprise brand experience
- **Enterprise Returns Management** – Benefit from quick returns and exchanges by the customer, while optimizing reverse-logistics flows to induct the inventory back into the supply chain at the most optimal location and price

Blue Ridge's cloud-native supply chain solutions combine intelligent science with robust automation and price optimization, empowering retailers to capitalize on omnichannel demand and react to complex changes with efficiency.

enVista's market-leading, functionally rich OMS is the cornerstone solution required for omnichannel retail success, optimizing omnichannel order management and orchestration and delivering the enterprise inventory visibility required to unify commerce.

SYNCHRONIZED OMNICHANNEL PLATFORM

Combining supply chain planning and forecasting with order orchestration and visibility – in real-time – to increase omnichannel inventory agility and profitability
