

Quick Facts

Food Safety Modernization Act (FSMA 204) Compliance Strategy

enVista's team of traceability and technology experts is dedicated to assisting businesses in achieving FSMA 204 compliance by the end of 2025, offering tailored project options to address unique organizational needs related to food safety regulations.

FSMA 204 is an ordinance from the FDA that establishes traceability recordkeeping requirements for companies that manufacture, process, pack or hold foods identified as having a higher food safety risk. This includes produce, fish, nut butters and cheese.

At enVista, we stand at the forefront of this evolving landscape, equipped with a dedicated team of traceability and technology experts. Our specialists possess a wealth of knowledge and innovative strategies essential for navigating the complexities of FSMA 204 compliance. We are committed

to partnering with your organization to ensure seamless alignment with FSMA 204 guidelines by the culmination of 2025.

Choose enVista for solutions tailored to your unique business needs. We offer a diverse selection of project options, each meticulously designed to address your operational intricacies and facilitate swift and effective compliance with FSMA 204 mandates. Let enVista be your trusted ally on the journey toward ensuring regulatory adherence and enhancing food safety protocols within your supply chain.

Seven to Nine-Week Compliance Strategy

If your supply chain involves a wide variety of products in large amounts and several partners, vendors and other stakeholders, you should consider enVista's seven to nine-week compliance strategy.

| Weeks 1-2 | Weeks 3-5/8 | Weeks 5-7/8-9 |
|---|--|--|
| Phase One - Evaluation | Phase Two - Partner Assessment | Phase Three - Execution |
| <ul style="list-style-type: none"> • Item list review - Review your items and create your own food traceability list. • Network design overview - Identify all critical tracking events in your supply chain. • Traceability scope - Determine the full scope of your traceability needs. | <ul style="list-style-type: none"> • Partner analysis - Audit your supply chain partners to determine involvement in the compliance strategy. • Data flow evaluation - Review your current data flow strategy. • Risk assessment - Determine and record where risk exists in your supply chain. • Partner education material - Educate your supply chain partners on our findings and how they will impact their operations. | <ul style="list-style-type: none"> • Internal education - Educate your organization on our findings and how they will impact your operations. • Execution playbook - Enable you to execute your traceability compliance strategy with an execution playbook. |

Five-Week Compliance Effort

| Week 1 | Weeks 2-5 |
|---|---|
| Phase One - Evaluation | Phase Two - Partner Assessment |
| <ul style="list-style-type: none"> • Item list review • Network design overview • Traceability scope | <ul style="list-style-type: none"> • Partner analysis • Data flow evaluation • Risk assessment • Partner education material |
