

# Mobile & Edge Technology Solutions

Empower your operations through real-time connected agile workers, technologies, applications and processes constantly interacting at the intelligent edge of your business.

## What Is the Intelligent Edge?

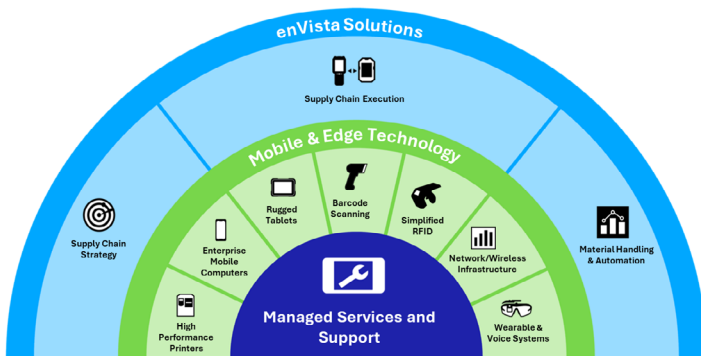

The intelligent edge is where work thrives and the difference is made. It's the hub of production, distribution, product selection and sales. Deliveries are precise and timely, and services ensure operational efficiency and customer satisfaction. enVista brings together supply chain expertise, software, automation, mobile computing and other edge technologies to help business unlock the power of their data and improve workflows and performance.

## Integrated Solutions for Optimal Operations

At enVista, we recognize having properly integrated

supply chain strategies, business software and edge technologies are essential for optimizing the physical and digital operations of our customers. While many other providers focus primarily on consulting and software, enVista realizes edge technologies interfacing with these systems – such as mobile computers, barcode and RFID – are incredibly important to ensure accurate data and transactions are quickly processed and consumed by such business systems.

Our team of highly experienced solution architects can help assess your existing devices and landscape, analyze your workflows and guide your company in choosing and deploying the right modern edge technology products for your workers and operations.

enVista maintains top level partnerships with leading companies such as Zebra Technologies, Honeywell, SOTI and many other to ensure we are always offering the right products with the best competitive pricing and manufacturer support for our projects and customers.

## Key Edge Technologies

**Mobile Computing:** Enterprise grade and rugged handhelds, tablets, forklift/vehicle mounted, wearable and voice devices

**Barcoding:** Industrial, desktop and mobile label printers, scanners and imagers

**RFID:** Readers, portals, mobile and large area RFID capture technologies

**Work Cells:** Small footprint integrated packing, shipping and returns work stations

Other Edge Technologies include machine vision, IoT sensors, 5G and more.

## Service Offerings for Seamless Integration

enVista also maintains a full complement of professional services offerings for deployment, management and support of these technologies to help reduce risks. This also ensures optimal project execution and system performance from day one and throughout the entire system lifecycle.

- Assessment and System Design
- Proposal, Procurement and Leasing
- Site Survey and Preparation
- System Kitting, Asset Tagging, Logistics and Delivery
- Project Management
- Installation and Configuration
- Training and Documentation
- Device Management Software
- Managed Help Desk and Support Services
- Device as a Service (DaaS)
- Full System Lifecycle Management

Our customers trust enVista to help choose, deploy and support these systems that ensure accurate data flows through their supply chain and other business systems.
