

PARTNERSHIP PROFILE

enVista has partnered with Phenix to deliver advanced, integrated scheduling solutions that enhance operational efficiency and resource management. This collaboration merges enVista's extensive expertise in supply chain and logistics with Phenix's innovative scheduling technology, providing businesses with a powerful tool to optimize workforce and resource scheduling.

Partnership Highlights

enVista and Phenix's strategic collaboration ensures seamless integration and optimal functionality of scheduling solutions. Customers benefit from exclusive advantages and access to cutting-edge scheduling technology, along with enhanced support including comprehensive project management and managed services, to ensure successful implementation and ongoing performance for Phenix Production Scheduling software and Phenix Product Wheel Design.

Phenix Production Scheduling

Phenix's Phenix Production Scheduling software

optimizes production efficiency by easily deciding what products to make on each line and sequencing them to minimize changeovers, while balancing corporate objectives.

- Calculate common scheduling parameters and harmonize these with ERP and planning systems, so that schedules deliver optimal manufacturing performance.
- Real-time scheduling communications ensure everyone is in sync with the latest scheduling decisions.
- Take advantage of Phenix Generic Algorithm AI to schedule related products together in the best sequence to minimize changeovers.
- Respond effectively to capacity challenges with alerts when there are scheduling problems due to conflicts or disruptions and simulate scheduling outcomes.

Phenix Product Wheel Design

Phenix's Product Wheel Design brings predictability and the economies of repetition to your scheduling.

Production will fall into regular, repeating cycles, extending this stability throughout the supply chain. Phenix Product Wheel Design enables confident decision-making when managing rush orders, equipment failures or resource issues.

- Define optimum sequences, cycle times, frequencies and inventory targets for each SKU. Generate schedules that are aligned with service, throughput and inventory goals.
- Automatically generate production sequences and optimize rescheduling when dealing with disruptions.
- Create new schedules in seconds leveraging Aligned Product Wheel™ capabilities and simulate reschedules and immediately see the impact.
- Automatically re-arrange the schedule, for example, extending a run into downtime, moving a run to start of the next uptime or rescheduling to minimize changeovers.

Customer Benefits

By combining Phenix's scheduling technology with enVista's strategic services, businesses receive comprehensive, high-performance solutions. This collaboration ensures cost efficiency through competitive pricing and streamlined operations. Customers experience enhanced performance with superior efficiency and accuracy in workforce and resource scheduling, thanks to advanced AI-driven features. Moreover, the partnership keeps businesses future-ready with innovative scheduling solutions that provide real-time data and insights, ensuring agility and responsiveness.

Implementation Approach

Initial Assessment

- **Consultation:** enVista consults to understand your specific scheduling and resource management needs.
- **Analysis:** Analyze current processes to identify improvement areas and integration points.

Solution Design

- **Customization:** Design tailored scheduling solutions to fit your business needs.
- **Integration Planning:** Strategically plan for seamless integration with existing systems.

Deployment

- **Implementation:** Expertly deploy Phenix scheduling software with minimal disruption.
- **Training:** Provide comprehensive training to ensure your team is fully equipped.

Ongoing Support

- **Monitoring:** Continuously monitor for optimal performance and prompt issue resolution.
- **Maintenance:** Regularly update and maintain the system for smooth operation.

With deep understanding of industry challenges and Phenix's cutting-edge scheduling technology, enVista ensures your business achieves maximum efficiency, flexibility and competitive advantage. Our commitment to innovation, seamless integration and ongoing support means that you not only meet today's operational demands but are also well-equipped to navigate future challenges.
