## Manhattan Supply Chain Intelligence Implementation

An implementation can usually be completed in less than three months with only a few weeks on-site at your facility.

Manhattan Associates' Supply Chain Intelligence (SCI) provides the business intelligence and visibility information your business needs to make strategic supply chain decisions. SCI uses powerful data analytics to give you strategic insight into your supply chain operations.

### SCI features:

- Easy-to-read, customizable reports
- Key performance indicator monitoring
- Real-time alerts

### SCI enables you to:

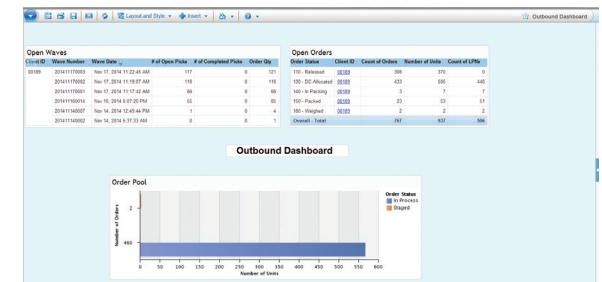

- Personalize reports authored by others
- Create alerts to critical business events that need action now
- Create scorecards that measure and evaluate performance
- Create role-based permissions and views
- Distribute information through the web, through Microsoft Office and to mobile devices (iOS and Android)<sup>1</sup>

### Implementation

enVista offers complete SCI implementation and integration services. SCI can be implemented with

Manhattan's WMS systems, including: WMOS, iSeries, and SCALE. enVista's experienced consultants can implement SCI simultaneously with your WMS implementation or independently.

enVista's implementation of SCI is quick and cost-effective. An implementation can usually be completed in less than three months with only a few weeks on-site at your facility.

### Benefits:

- Increased visibility to key performance indicators
- Data analytics to enable strategic decision-making
- Seamless integration with Manhattan's WMS products
- Ability to combine with Manhattan LM reporting to have all reports on one dashboard
